

Urbania sliding patio door, 95½" × 95½" painted black with black Studio handle

Urbania & Loft Aluminum Patio Doors

Courage changes everything. Our engineers had the courage to question everything and reinvent the aluminum patio door. A seamless vision between interior and exterior, with effortless operation, that brings color and design into your world — *that* is Urbania and Loft.

Panoramic View

Today's architectural trends follow the notion that the outdoors is an essential extension of the living space. Bright and open floor-to-ceiling windows have replaced large cumbersome structures expanding the limits of architectural freedom. With wider panels and fewer frame elements, Urbania & Loft provide a large glass surface that open up your home.

Effortless Operation — A Sense of Quality!

High precision machined wheels and the available lift & slide mechanism make sliding oversized panels nearly frictionless. Each detail is designed to make opening and closing simpler and more enjoyable.

Exceptional Comfort and Energy Efficiency

Composite thermal barriers and an innovative sealing system combine to offer the highest performance ratings on the market. Urbania and Loft can be installed in Energy Star zones 1, 2, or 3 without restrictions.

Durable and Maintenance Free

Does a robust door need heavy looking structures? The Urbania and Loft aluminum frames are minimalist in your line of sight yet engineered with the utmost structural integrity to withstand wind loads, shocks, and the toughest climates from -30°C to 72°C.

Security and Peace of Mind

Stronger means safer. Solid aluminum frames with fibre reinforced thermal barriers make the most solid doors you can install. Standard double-point locking system on the Urbania sliding door — standard triple-point locking system on Loft lift-&-slide door.

Loft lift-&-slide patio door, 119" x 95½" painted black with brushed chrome Kora handle

The Loft patio door designed to be larger than life!

Loft extends your living space into the outdoors. Its lifting mechanism ensures large glass panels are easy and simple to move while providing unparalleled airtightness when closed. Two panel configurations — in lieu of three or four panel — define contemporary lifestyle and breathtaking atmosphere. Safe, durable, easy to operate and energy efficient, this door is the best from Novatech.

One System,
Two Doors

Urbania

Sliding Patio Door

Personalize and customize your Urbania door through contemporary or classic handles, multiple color and glass options.

- Glass surfaces that create an ambiance
- Double-point locking system for top security
- Standard Low E Argon sealed units
- High quality corrosion resistant tandem wheels

Loft

Lift & Slide Patio Door

Loft brings you the performance and beauty of Urbania and more. Its lift & slide mechanism allows greater architectural flexibility and configurations typically reserved for folding doors or other, more complex systems.

- Height and width like never before
- Triple-point locking system for top security
- Standard Low E Argon sealed units
- High quality corrosion resistant tandem wheels
